Template

Brainstorm & idea prioritization

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

🕐 **10 minutes** to prepare
👤 **1 hour** to collaborate
2-8 people recommended

Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.
⏱ 10 minutes

Team gathering
Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.

Set the goal
Think about the problem you'll be focusing on solving in the brainstorming session.

Learn how to use the facilitation tools
Use the Facilitation Superpowers to run a happy and productive session.
Open article

Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.
⏱ 5 minutes

PROBLEM
Analysing the people with symptoms like fainting,chest tightness,chest pain,shortness of breathe,slow/fast heartbeat and predicting heart disease in them

Key rules of brainstorming
To run a smooth and productive session

Stay in topic.   Encourage wild ideas.
Defer judgment.   Listen to others.

Go for volume.   If possible, be visual.

Brainstorm

Write down any ideas that come to mind that address your problem statement.
⏱ 10 minutes

TIP You can select a sticky note and hit the pencil (switch to sketch) icon to start drawing!

SARAVANAPRIYA R

Heart diseases describes a range of conditions that affect your heart cardiovascular diseases are the leading cause of death worldwide.

Tests to diagnose heart diseases may include ECG, Holter monitoring, Cardiac catheterization, Heart CT scan

Some advance data mining techniques can be used for prediction and analyses of heart disease.

A cholesterol test also called a lipid panel measures the fats in the blood. The measurements can help to determine the heart attack.

ANITHAB

The diagnosis of heart disease is based on signs, symptoms and physical examination of the patient.

Unhealthy activities like high cholesterol, obesity and hypertension are the reason for the increase in the risk of heart disease in humans

SWETHA P

Implementing effective heart attack prediction using Naive Bayes algorithm.

Person with smoking history may have chance of heart disease.

Heart disease treatment often starts with lifestyle modifications. These include eating a healthy diet, exercising regularly, quitting smoke and managing stress.

VANASUNDARI S

If a person working in IT industry must check their body often for a risk of heart disease.

Heart disease can be predicted based on signs, symptoms and physical test of the patient.

Heart disease can be predicted based on signs, symptoms and physical test of the patient.

Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.
⏱ 20 minutes

TIP Add customizable tags to sticky notes to make it easier to find, browse, organize, and categorize important ideas as themes within your mural.

Some advance data mining techniques can be used for prediction and analyses of heart disease.

Implementing effective heart attack prediction using Naive Bayes algorithm.

ECG is a quick and painless test to diagnose the heart disease.

Heart diseases describes a range of conditions that affect your heart cardiovascular diseases are the leading cause of death worldwide.

If a person working in IT industry must check their body often for a risk of heart disease.

Unhealthy activities like high cholesterol, obesity and hypertension are the reason for the increase in the risk of heart disease in humans

Heart disease treatment often starts with lifestyle modifications. These include eating a healthy diet, exercising regularly, quitting smoke and managing stress.

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.
⏱ 20 minutes

Importance
If each of these tasks could get done without any difficulty or cost, which would have the most positive impact?

Heart diseases describes a range of conditions that affect your heart cardiovascular diseases are the leading cause of death worldwide.

Unhealthy activities like high cholesterol, obesity and hypertension are the reason for the increase in the risk of heart disease in humans

Heart disease treatment often starts with lifestyle modifications. These include eating a healthy diet, exercising regularly, quitting smoke and managing stress.

TIP Participants can use their cursors to point at where sticky notes should go on the grid. The facilitator can confirm the spot by using the laser pointer holding the H key on the keyboard.

After you collaborate

You can export the mural as an image or pdf to share with members of your company who might find it helpful.

Quick add-ons

Share the mural
Share a view link to the mural with stakeholders to keep them in the loop about the outcomes of the session.

Export the mural
Export a copy of the mural as a PNG or PDF to attach to emails, include in slides, or save in your drive.

Keep moving forward

Strategy blueprint
Define the components of a new idea or strategy.
Open the template

Customer experience journey map
Understand customer needs, motivations, and obstacles for an experience.
Open the template

Strengths, weaknesses, opportunities & threats
Identify strengths, weaknesses, opportunities, and threats (SWOT) to develop a plan.
